"Yes, cit," said Oliver.
"See if you can take it out without my feeling it, as you have the how we were at play this morning."
"See if you can take it out without my feeling it, as you have then do when we were at play this morning."
"Oliver held up the bottom of the pocket with one hand, as he had seen the bodger do, and drew the handkerchief lightly out of it with the other.

theman, pasting Oliver on the bead approvingly "In ever awe a sharper lad Here's a shilling for you if they are as in this way, you will be the greatest man of the time."

Mr. Weed, the republican party of the State of New York has he Fagin. The thieves who glide through the lobbies of the Legislature at aleany respect the gentus of their thor, and acknowledge has power. Cadmus gave the world letters. It will be the distinction of the aleany Fagin that he gave America the "lobby." The hands that now boldly grasp a railroad grant, and jork a privilege (ant of a city's charter, were trained in youth to pick the pasters of the world letters. It will be the distinction of the aleany tender their foreign born invants to be the heirs of their mothers' estates—to take which and shuff box from a gentlemen while asking for Dermission to strip shirt pla crooked highway through his own land—to strip shirt pla crooked highway through his own land—to strip shirt pla crooked highway through his own land—to strip shirt pla greated a case and handkerchief from a sensitive man hegging the Legislature to let hun change a name of baptism that exposed bim to ridicule

"Do you see anything goot hanging out, my dear?"

"Yes, sir. There is the Receiver of the Lake Erie and Jorsey City Railroad wot is gone up, as wants something to fasilome his paying its post deas."

"See if you can get live huncred out of him. Do as you saw me do."

A bill of exchange to that amount, openly collected through an albany bank, may yet serve in the political history of New York to attest in belplessness of a suitor to the Legislature of the Empire State, and the audacity and soutogralem of the history of New York to attest in belplessness of a suitor to the Legislature of the Empire State, and the audacity and soutogralem of the interest who have been educated to confirm its action. The outpuble idleness to look into shop windows, properly punished by the loss of a snuf box. To stand at a book stall readiled in a queer old volume, is a waste of time, of

tate of New York, will fasten upon you for ever and ver a heavy responsibility for the birth and existence is the Arbany lobby.

Sir, you will agree with me that the corruption of the gislatir in of an empire is a very awful thing to consider. It is a horror, to be classed with the occirinal all of man and the ruin of a race. We know of no inckedness within human abdity at all to be compared with it. We know no sorrow such as the spectace of a will kindle in the soul of a large and true man minettee of in amy i set in this case the inevitable coult of one man's organization and of cirmstances. The cheer van Buren and his copartness ad reduced politics to a m-chanical method, and proceed from it exact mechanical results. Necessity, at and reduced position to a m-chanical method, and produced from the tyrang of the ide Reyney, in the person of an unculcated type setter (I on not use these as words of reproach), whose perception of the evropubilities of human nature was incensible in to an inspiration, and whose expactly for organizing them as clusted a poulcid, party arose to genus. FINANCIAL AND COMMERCIAL.

MONDAY, April 1-6 P. M. The bank statement of to-day compares as follows with that of last week :-

Week ending Loans Specie. Circulat'n, Deposits. March 23...\$120 750,455 29 480,046 8,345 011 91 940 223 March 30...120,753,165 41 408 308 8 434,840 93,611 898 Increase... \$202,710 1,948,262 89 329 1,674,675 Thus the only change of consequence since last Monday has been an increase of nearly two millions in the specie and not quite as much in the deposits. The specie column is now several mil-

lions higher than it ever was before, and next week's average will show a further increase still. The award of the new loan will for a time reduce the bank reserve; but the government is in no condition to hoard money, and the gold will find its way back into bank in a very short time. Next week the banks will have an opportunity of increasing their loans by advancing money on the new federal stock. It will, in this respect, prove

a godsend to them. The New York bids for the new federal loan of Washington, were made up at four P. M. to-day. Two leading city brokers have gone to Washington to bid in person; but the bulk of the bids were sent by mail in the usual way. The brokers and bidders have affected unusual mystery concerning this loan; but still it seemed pretty generally understood this afternoon that the aggregate amount of bids would be more than twice the amount asked for by the government, and the rate offered more than two per cent better than the average rate at which the loan of February 22 was awarded. So far as we could learn, nothing was determined, at a late hour this afternoon, respecting a combination bid by the banks. Several large banks, among others the Bank of Cemmerce, will bid for themselves and their customers, and perhaps a round-robbin may be telegraphed to an agent at Washington to-morrow morning. A combination bid for something like \$4,000,000 is understood to have been made up by Messrs. Ketchum, Son & Co., and others for smaller amounts by Messrs. Whitehouse, Son & Morison, and Read & Drexel. It seems to be supposed that most of these bids will range between 92% and 93. According to the street rumors, the public have been bidding pretty freely, and a large number of bids bave been forwarded at rates ranging from 93 to 95.

It is hence inferred by parties who are accustomed to judge of these matters that very little, if any, of the loan will be awarded below about 92%. while a considerable amount will go above 93. It is certain at any rate that the government will be offered much more money than it needs. Mr. Chase has been urged in many quarters not to award any stock below a certain figure say 95 but to issue Treasury notes at par for any money he may need over and above the sums which may be offered him at 95. This would be very good policy for Wall street, but very bad policy for the government. Wall street wants as many negotiations of government loans as possible, and the lower the better. The government's interest is that negotiations of loans should be few, and the price obtained for its securities as high as possible. This interest will be better served by the issue of a twenty years stock than by that of Treasury notes which will come back upon the Secretary for redemption in the course of one or two years, when perhaps, he may be less able to borrow money than now. Mr. Chase will commit an error if he rejects any bids to-morrow on the ground of their being too low. It is unfortunate that the public credit should have fallen, but there is no use dodging the fact, and the part of wisdom now is to make the best of it, and keep out of the market as much as possible until government credit stands higher.

Money continues abundant, and at the same rates as quoted on Saturday. Foreign exchange is firm at 1081/4 for sterling, and 5.221/4 for france with very little demand and not much disposition on the part of bankers to sell. The New Orleans bankers have about three millions sterling in reserve here to draw against. Gilt edge paper is

very scarce at 6 a 7. The stock market opened dull this morning, but improved after the first board, was better in the afternoon, and closed very steady. The government 6's fell off 1/4 this morning, Missouris 3/4. Tennessees 1/4. Virginias 1 per cent. The Western

The London Times of the 16th of March, in noticing the fact that the Confederate American States are in market with a loan of \$15,000,000, which they wish to place at eight per cent for ten

which they wish to place at eight per cent for ten years, remarks:—

As the new confederacy includes in its total population of 5.100,000 no less than 1.050,000 who are piedged to repudiation, it is difficult to uncerstand the possibility of such an amount being raised either in home or foreign markets. This feeling is increased by the fact that, indirectly, the entire population may be considered to have signified their approval of repudiation as a principle, by having selected Colonel Jefferson Davis as their first free sident. This personage has long been regarded as the apostle of repudiation, and the holders of Mississippl bonds have reason to remember his celebrated speech, delivered within the legislative hall built by British money, in which he ridiculed the "crocodie tears" of the dupes who had ventured to petition for payment of their claims.

Stock on April 1, 3864...11.834 1.083 4 12.921

Mr. Rader, in his monthly circular, makes the following general remarks:—Burness coutinues very duli; stocks of Spanish leaf are quite low, and importations will necessarily be very light at the ruling prices in Haaana libere are no encouraging signs yet of an improvement in the home demand, and prices being held firmly, high purchases are only made when necessity forces dealers or manufacturers on the market. Havana fillers are now selling at 36c a 33c for medium sorts, and 35c a 42%c, for good and fine. 2,000 bales Gibara, in usual assort ments, were sold at a full price for consumption, and scarcely any Cuba left in first hands. The only arrival of Yara, per Saginaw, mostly Buy, was sold at 32c, and the scarcity of this sort is so much felt that even higher prices would be paid for further supplies. In Kentucky leaf but a very moderate business has been done, and prices, though nominal, are still firm, as our present stock of old crop must soon find a market in preference to the new crop, which will turn out but little desirable. Heavy fine sorts are very scarce, and held at 11½c a 13c. The export demand for seed leaf was steady up to the last week of the past month, but prices were gradually advancing, shipments were very heavy, freights very high, and shippers concluded te suspend larger operations until they could be under taken with more safety. Large speculative purchases have been made in the new crop in the different sec Stock on April 1, 3864...11.834 1,083 Mr. Rader, in his monthly circular, ma 12 921

te suspend larger operations until they could be under taken with more safety. Large speculative purchases have been made in the new crop in the different sections, and one thing is certain, that exporters cannot buy the new as cheap as they have done the old crop, which now is nearly exhausted. The quantity raised this year is far short of the last. Whiskey was active and firmer, while the sales ombared about 1,100 a 1,200 obis at 180, a 18 ac.
